

Robust technology solutions that enhance learning outcomes

With broad understanding of the latest trends and tools, Knowing Technologies will remove your technology impediments.

- Address your issues when and how you need
- Always-on schoolwide WiFi
- Firewalls and security
- Backup and disaster recovery plan
- 24/7 performance monitoring

Collaborating with educators to effectively integrate technology into their classrooms

Today's students are growing up in a world that is increasingly reliant on technology. To be relevant, their learning environment must include engaging, useful interactions with technology. Our program helps teachers become masters of the digital space, able to seamlessly integrate technology with learning.

- Transformative professional development for educators, with trained faculty becoming your next instructional technology leaders
- Customized in-house program with personal meetings and classroom support
- Guidance toward a 21st-century learning environment, with new tools, platforms, and devices

“Our meetings promote innovation and an entirely new way of thinking about content delivery and education.”

*—Sarah Paff, English Instructor,
Santa Catalina School*

Outsourced tech with in-house personalization

We're high-touch, with daily on-site and constant remote helpdesk support, weekly on-site and constant remote network support, and 24/7 monitoring with rapid response.

- One consistent point of contact, backed by a team of specialists
- The latest tools, trends, and methodologies
- Future-looking strategic technology plans and budgets

“One of Knowing Technology's greatest assets is their ability to fit seamlessly into a school's culture. We feel like their support staff are a natural extension of Vistamar's faculty and staff, and we've truly enjoyed working with them.”

*—Dr. Moss Pike, Director of Educational Technology,
Vistamar School*
